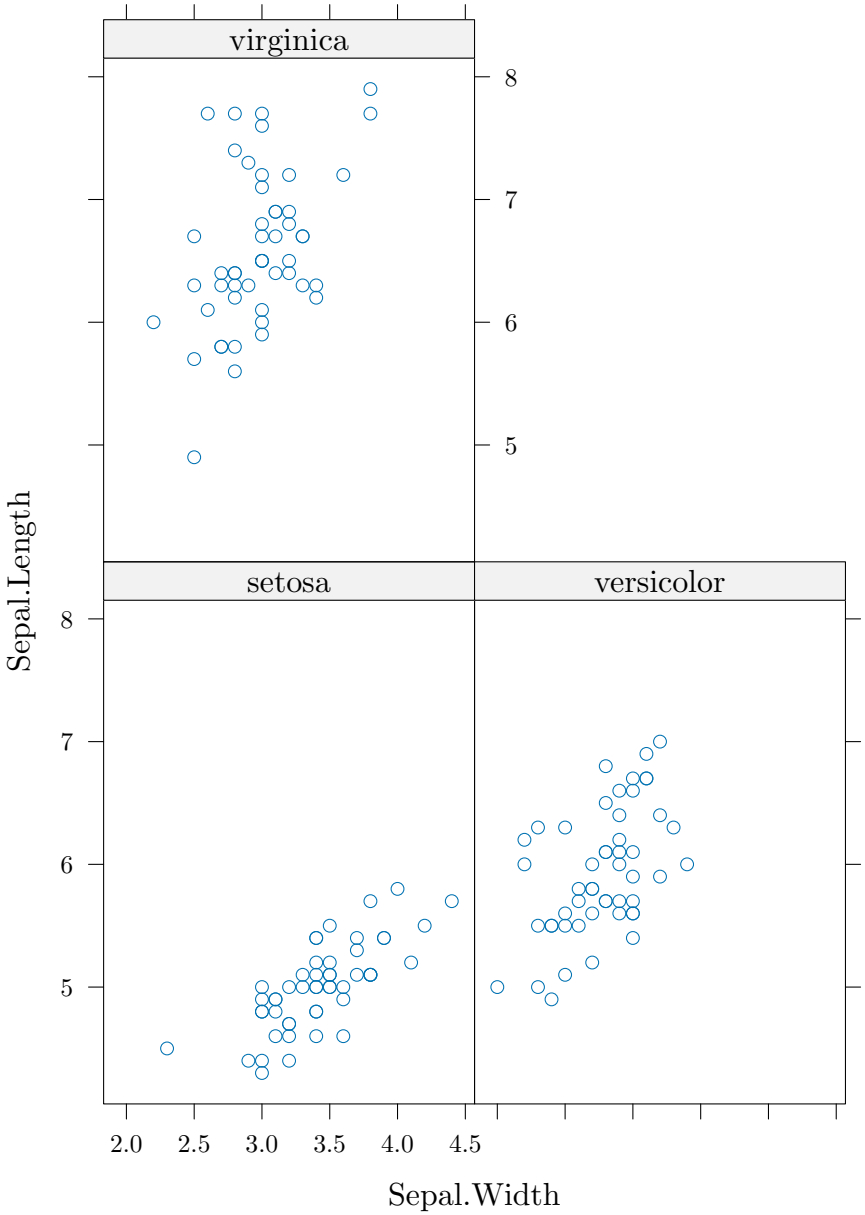
Create link texts in the data:

```
library(lattice)
data(iris)
iris$hyperlink <- paste("\\hyperlink{", iris$Species,
    "}{", iris$Species, "}", sep = "")
iris$hypertarget <- paste("\\hypertarget{", iris$Species,
    "}{", iris$Species, "}", sep = "")
```

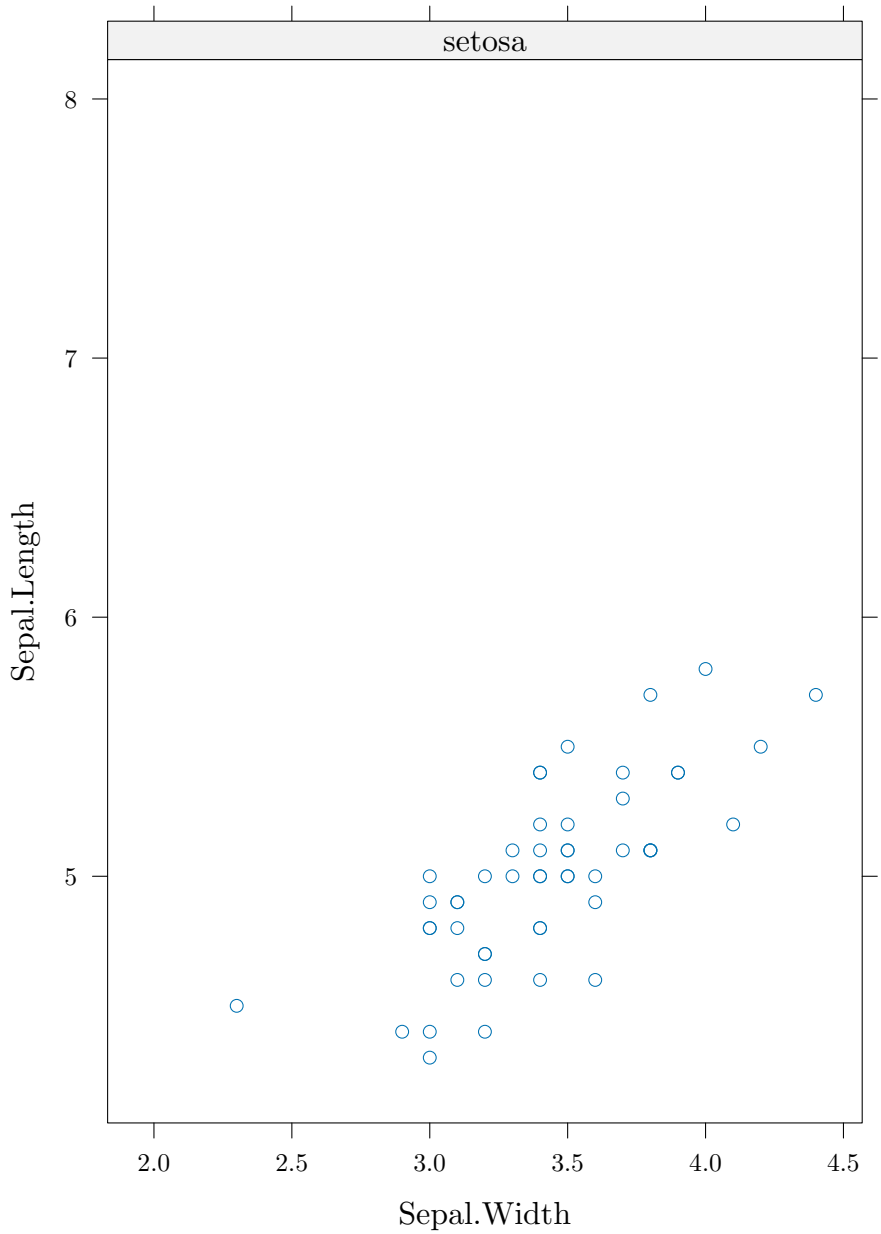
Draw these texts in plots (you can click on the labels):

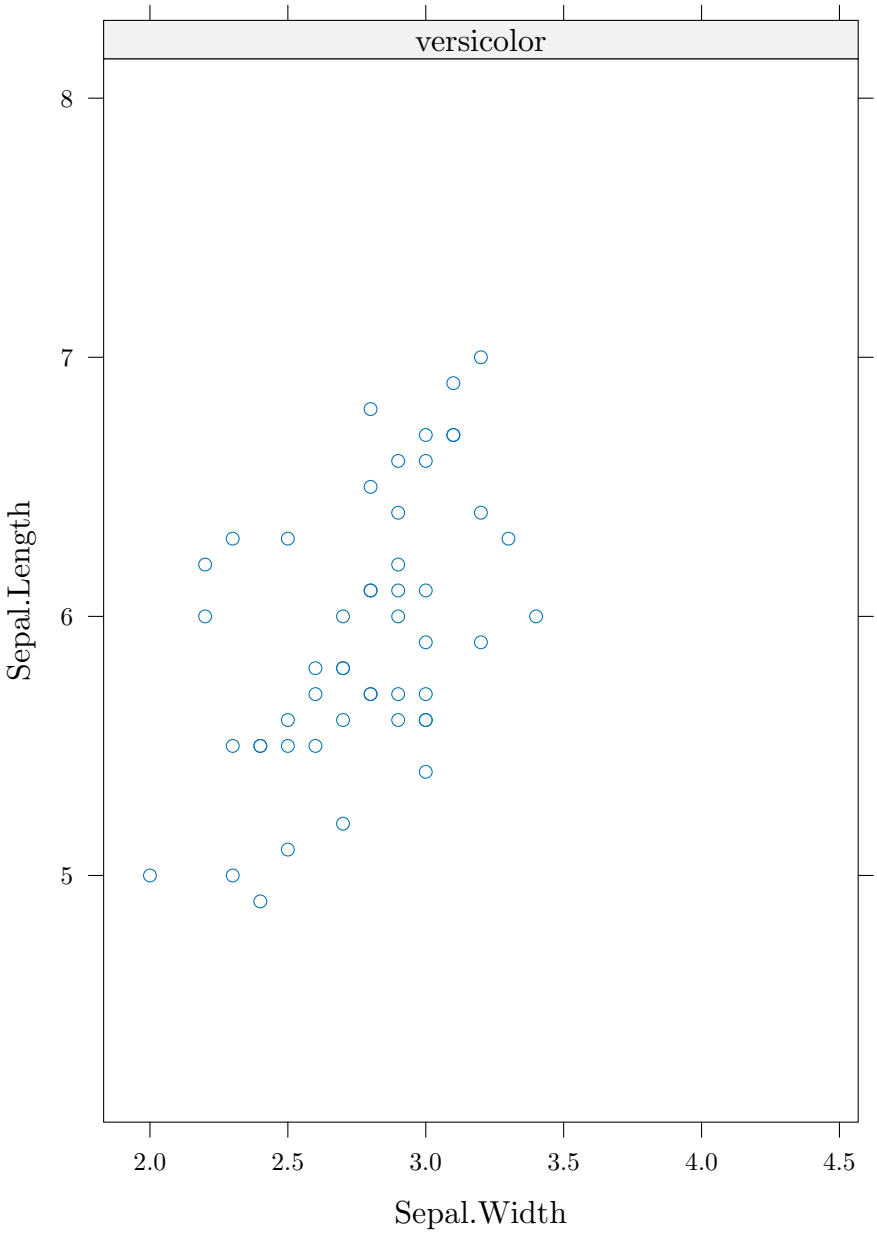
```
xyplot(Sepal.Length ~ Sepal.Width | hyperlink, data = iris)
```



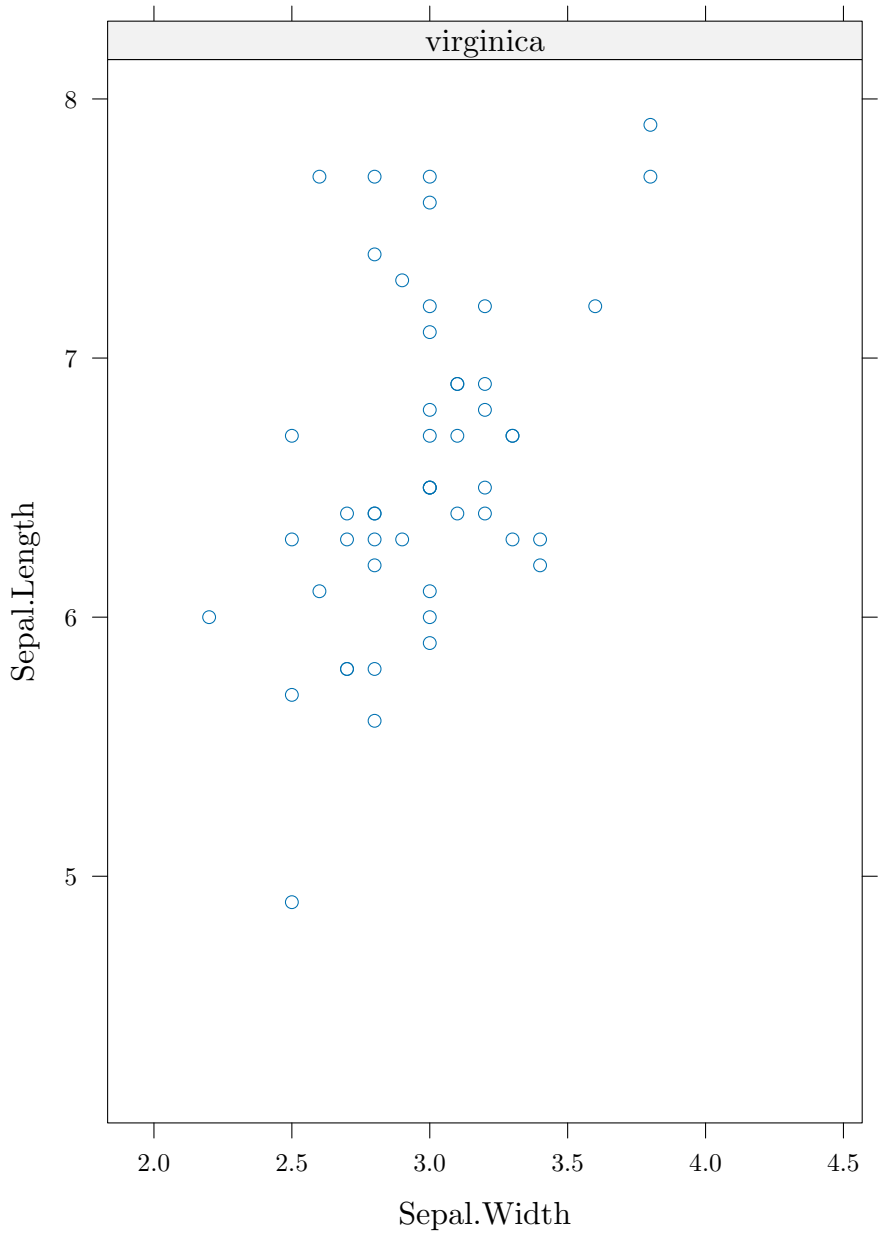
virginica
setosa
versicolor
Sepal.Length
Sepal.Width
8
7
6
5
2.0
2.5
3.0
3.5
4.0
4.5

```r
xyplot(Sepal.Length ~ Sepal.Width | hypertarget, data = iris, layout = c(1,
    1))
```





versicolor
8
7
6
5
Sepal.Length
2.0
2.5
3.0
3.5
4.0
4.5
Sepal.Width



Note the option external has to be FALSE here, otherwise LaTeX will not be able to find the link target in the document.
